Kiel,

I don't think modifications are needed, I may have misspoke when talking informally with Chuck about the plans laid out in 2014. In order to DNR to close the site we would need the investigation and source remediation completed. I imagine EPA will require the same when it comes to deletion off the NPL. I know DNR is hesitant to close a site before deletion, so this we'll likely work in step with EPA to move the site forward.

Maybe this would be a good topic for future conference calls.

Thanks,  
Matt

**Subject:** Wausau Remediation Proposal Inquiry

Greetings Matt,

I had my monthly call with the City of Wausau and they expressed interest in GHD providing an updated proposal for final remediation of the East Bank portion of the Wausau Superfund Site. GHD previously provided the City a proposal six or seven years ago but the City decided to table purchasing the Wausau Chemical property at that time. They are picking up steam on getting the riverside redevelopment project up and going and want GHD to update the proposal. I spoke with Chuck Ahrens about this and he mentioned you said that parts of the current DNR regulations might contradict the plan set forth in 2014 by DNR to help gain closure at the Site.

I have attached a couple short reference documents to jog your memory. Would you be able to take a look at these and let me know what modifications we would need to plan for in our remedial strategy?

Please reach out if you have any questions.

Thank you for your time,

**Kiel Jenkin**
